

Announcing

Boulder Solar Day

Friday, September 25, 2026

8:30 AM–6:00 PM

Keynote by

Steven Cranmer, CU / LASP:

**"Seeing both the Forest and Trees:
Understanding the Dynamic Sun with
Parker Solar Probe, PUNCH, and
Decades of Archival Data"**

*Followed by a tasty buffet reception,
Poster sessions throughout the day*

Hosted by HAO at Center Green Bldg 1

This informal annual 1-day meeting brings together researchers from local institutes, including CU, HAO, LASP, NCAR, NOAA, NSO, NWRA, and SWRI, as well as visitors from other solar institutes to discuss current progress on solar instrumentation, observations, and models. Participation is free and open to anyone interested in local solar research.

See our webpage and register at:
