

**HAO**  
**75<sup>th</sup> Anniversary**

**Instrumentation from the  
Ground and Up**

**Alice Lecinski**

- It has been my honor and privilege to help give life to many HAO Instruments.
- I have my favorites, but I'd like to hear about yours!

We've got 5 minutes.

Please raise your hand, tell me your name, the instrument and briefly why, like:

Best instrument ever

Or

Best team ever

Or...

I'll repeat it for the mic, write it down, and we'll have these treasures for posterity.

Thanks!

- **Ray Bovet**  
WLCC Skylab. It brought me to HAO.
- **Judd Johnson**  
WCL Spartan 201
- **Cherilynn Morrow**  
Fourier Tachometer. Revealed intricacies of solar rotation.
- **Jack Harvey**  
Climax Magnetograph. My thesis material.
- **Scott McIntosh**  
CoMP. First observations of Alfvén waves.
- **David Elmore**  
Hinode Spectro Polarimeter
- **Ricky Egeland**  
Solar-Stellar Spectrograph. Long lived and still running at Lowell Observatory.
